“Freight is our reason for being.”

More than thirty years after opening our first office in Madrid, we still do what we did on day one: listen to what each customer needs and move their cargo as if it were our own. These pages tell you who we are, what we do and where to find us.

SINCE 1995

We are Lantia Marítima.

Since we started in 1995 we have been through a genuine business transformation. Growth over the last decade has made us one of the leading freight forwarders, in Spain and in the international markets where we have our own offices.

We get to know your needs so we can tailor our services, with personal attention: we stay with you throughout the process and advise you on the best options, in service and in price.

Our multidisciplinary team is trained and specialised in every department, with one shared goal: excellent service. We work in English, French, German, Arabic and Chinese.

Globalisation demands immediate answers and short lead times. That is why we keep improving our tools and keep training our people.
